XR developer

XR developer with 3 years of experience developing augmented and virtual reality applications for diverse industries, such as medical technology and aircraft production using Microsoft HoloLens 2 and Magic Leap 2.

WORK EXPERIENCE

Development Engineer • Full-time • 07/2024 - 01/2025

Institute for Aircraft Production Technology (Hamburg University of Technology) • Hamburg

- Researched and evaluated the feasibility of an XR-based solution for leakage inspection aiming at improving inspection accuracy and efficiency.
- Directed a team of three to develop IoT-powered AR app for quality control in aircraft manufacturing.
- Optimised the XR interactions for enhanced human-computer interaction through user-centric design, intuitive navigation, and responsive feedback mechanisms.

Technical Employee • Full-time • 01/2024 - 07/2024

Institute for Aircraft Production Technology (Hamburg University of Technology) • Hamburg

- Designed and implemented an augmented reality application in Magic Leap 2 for hydrogen leakage inspection and ensuring safety in a containerized electrolyser plant.
- Managed Git workflows, including branching, merging, pull requests, and conflict resolution.
- Spearheaded the rapid prototyping of interactive applications and game mechanics in Unity Engine, leveraging asset integration, custom scripting, and iterative development to validate and refine concepts.

Student Research Assistant • Part-time • 05/2023 - 12/2023

Institute for Aircraft Production Technology (Hamburg University of Technology) • Hamburg

- Integrated model-based object tracking using computer vision models from PTC vuforia.
- Implemented animations and UI supporting the user guidance within the application.
- Configured multilingual speech-based interaction systems for HoloLens 2, enhancing accessibility and user experience across diverse language groups.

SKILLS

Language: English
Fluent C1, German
Intermediate B1

Programming languages:
C#, Matlab, Python

Softwares: Ansys Fluent, Aspen HYSYS, Aspen Plus, Autocad Plant 3D, Blender, Microsoft Office, OpenFOAM, Unity, Vuforia

Soft skills:
Communication expert, Excellent time management, Growth mindset, Independent, Strategic organizer

EDUCATION

XR Foundation and Prototyping Bootcamp in Extended reality

XR Bootcamp GmbH
Remote
10/2024 - 02/2025

Prototyping, and deployment across multiple XR platforms. Structured learning path that includes 4 prototype projects and 2 final minimum viable products (MVP).

Master Of Science in Chemical And Bioprocess Engineering

Technical University Of Hamburg
Hamburg, Germany
GPA: 1.9
11/2020 - 01/2024

Student Research Assistant • Part-time •
07/2022 – 09/2022

Institute for Medical Technology and Intelligent Systems
(Hamburg University of Technology) •
Hamburg

- Engineered a solutions-oriented AR application using Unity, allowing medical staff to interact with ultrasound data seamlessly, improving workflow efficiency by 30% within 3 months.
- Optimised runtime asset loading by utilising asset bundles and Microsoft Azure cloud services.

Bachelor Of
Technology in
Chemical
Engineering

University Of Calicut
Malappuram, India
GPA: 2.3
08/2013 – 04/2017

CERTIFICATIONS

Driving License: Category B • 09/2024 – Present

LBV Deutschland

XR hack Participation Certificate • 08/2024 – 08/2024

Global XR Hack

XR Creator Con • 06/2024 – 06/2024

Immersive insiders

Learn Python Programming Master Class (Udemy) •

01/2020 – 12/2020

Udemy

AWARDS & SCHOLARSHIPS

Beyond Inclusion Scholarship • 10/2024

XR Bootcamp

PROJECTS

Development of an extended reality tool for CFD aided design •

07/2023 – 01/2024

Institute for Multiphase Flows (Hamburg University of Technology)

An augmented reality application designed to help operators and engineers simulate and visualize CFD simulations in real time through an intuitive and user-friendly interface.

Digital twin for high pressure reactor using extended reality •

11/2022 – 02/2023

Institute of Multiphase Flows (Hamburg University of Technology)

Developed a detailed digital twin of the reactor setup for integration into XR applications, enabling immersive visualisation and remote control via AR devices like HoloLens 2.

VOLUNTEERING & LEADERSHIP

Next Reality Festival 2024 • 11/2024 – 11/2024

Volunteer • Hamburg

AWE XR Expo Europe 2024 • 10/2024 – 10/2024

Volunteer • Vienna
